## SYMBOLS

The following standard symbols are used in this publication:

..	figures not available
...	figures not appropriate or not applicable
-	nil or zero
--	amount too small to be expressed
x	confidential
p	preliminary figure(s)
r	revised
M	thousand(s)
MW.h	megawatt hours
GW.h	gigawatt hours

Note: Components may not add to total due to rounding.

## PREFACE

The Alberta Statistical Review, Quarterly provides statistical tables and graphs containing monthly or quarterly data on the economy of Alberta, as well as a brief narrative highlights page. The publication is organized into the following ten sections: Summary of Major Economic Indicators, Population, Labour Force and Related Statistics, Price Indexes, Energy and Natural Resources, Construction, Manufacturing, Agriculture, Trade and Commerce and Travel. The majority of the tables present data at the provincial level while others present data for communities or compare the economy of Alberta with that of Canada and other Provinces.

To obtain additional information regarding this publication or the data within, users are invited to contact the Information Services Section, Alberta Bureau of Statistics, (403) 427-3058.

GLOSSARY.....	101
---------------	-----

HIGHLIGHTS  
AND  
SUMMARY OF MAJOR ECONOMIC INDICATORS

## HIGHLIGHTS

- Preliminary estimates indicate that on 1-Jan-83 Alberta's residents numbered 2,341,000. Although the quarterly rate of Alberta's population growth continues to moderate, it remains one of the highest in Canada, surpassed only by that of Saskatchewan during the most current three month interval.
- The Consumer Price Index (CPI) for both Edmonton and Calgary increased 0.7 percent during Mar-83. In both centres, this monthly increase largely reflected higher gasoline prices and higher prices for alcoholic beverages purchased from stores. In both Edmonton and Calgary, declining food prices, especially for beef, chicken and fresh fruit, partially offset these upward influences. On an annual basis, the CPI for Edmonton and Calgary rose 6.6 percent and 5.9 percent respectively between Mar-82 and Mar-83. At the national level, the CPI advanced 7.2 percent during this same twelve month interval.
- Over the twelve month period preceeding Apr-83, Alberta's employed labour force declined 2.4 percent, to reach 1,049,000 persons in that month. The strongest contributor to the decline was the construction industry, where total employment fell by 20.8 percent between Apr-82 and Apr-83, affecting a net 21,000 persons. The impact of this decline was partially offset by employment increases in the service (up 6.6 percent) and public administration (up 5.4 percent) industries. During Apr-83, Alberta's unemployment rate was 11.5 percent, third to Saskatchewan (8.3 percent) and Manitoba (10.4 percent). In Apr-82, Alberta's unemployment rate was 7.0 percent.
- During Feb-83, 1,925 thousand metric tonnes of coal were produced in Alberta. This is an increase of 5.3 percent over Alberta's coal production in Feb-82.
- The value of all building permits issued in Alberta during Feb-83 was \$139,609 thousand, a drop of 55.5 percent compared to the same month in 1982. The most significant decline was registered for commercial construction, which fell by 83.4 percent, or \$163,004 thousand. During Feb-83, the value of residential building permits (40.7 percent of the total) was 26.8 percent lower than that of Feb-82. This general decline is largely attributable to a decrease in the number of building permits issued for row housing type dwelling units.

## GLOSSARY

## GLOSSARY

### AVERAGE WEEKLY EARNINGS

Average weekly earnings represent gross pay for the week, before deductions for taxes, unemployment insurance contributions, etc. This includes salaries, straight time wages, piece-work and regular commission earnings, regular paid incentive, cost of living and other bonuses, overtime earnings and payments to persons absent with pay in the survey reference week. The payroll concept does not include supplementary labour costs.

### BANK RATE

The Bank Rate is the minimum rate at which the Bank of Canada makes short-term advances to the chartered banks or to savings banks governed by the Quebec Savings Bank Act, and after 1-Dec-80 to all members of the Canadian Payments Association. Data shown is for the last Wednesday in the reference month.

### BUILDING PERMITS

#### Residential Building Permits - Number

Number of dwelling units created:

- 1) Single  
Refers to structures containing only one dwelling unit completely separated from any other dwelling or structure.
- 2) Cottages  
Refers to seasonal dwellings such as summer homes and house-boats.
- 3) Double  
Refers to dwellings found in structures containing two dwelling units such as duplexes and semi-detached dwellings.
- 4) Row  
Refers to one-family dwellings in a structure of three or more attached dwellings.
- 5) Apartments  
Refers to all multiple housing with three or more units such as triplexes, quadruplexes, row duplexes as well as apartments proper. Flats which are part of a non-residential structure are also included.

## BUILDING PERMITS (CONTINUED)

### 6) Conversions

Refers to dwelling units added by conversion of existing structures

### Residential Building Permits - Value

Value of building permits issued for residential construction including residential garages, swimming pools, alterations and improvements.

### Non-Residential Building Permits

Value of building permits issued for new construction, alterations and improvements for industrial, commercial, institutional and government construction.

#### 1) Industrial Building Permits

Includes buildings used for: manufacturing and processing; transportation, communication and other utilities and agriculture, forestry, mine and mine mill buildings.

#### 2) Commercial Building Permits

Includes stores, warehouses, garages, office buildings, theatres, hotels, funeral parlours, beauty salons and miscellaneous commercial - signs, posters, heating and plumbing installations, etc.

#### 3) Institutional and Government Building Permits

Includes expenditures made by the community, public and government for buildings and structures - schools, universities, hospitals, clinics, churches, homes for the aged, blind, deaf and dumb, government office and administration buildings, law enforcement, etc.

## CANSIM

CANSIM is the name given to Statistics Canada's computerized data base. It is often termed a general purpose data bank offering a detailed and conceptually compatible set of aggregate data pertaining to a large number of interrelated fields. CANSIM contains over 360,000 timeseries of socio-economic information. An example of a timeseries would be the annual population of Edmonton for a twenty-year period.

The Alberta Bureau of Statistics maintains approximately 6300 timeseries on CANSIM of Alberta specific data at both the provincial and sub-provincial level.

## CANSIM (CONTINUED)

The majority of information contained in this publication is available on CANSIM. For your convenience we have provided CANSIM matrix numbers at the bottom of most tables.

### CONSUMER PRICE INDEX

The Consumer Price Index(CPI) is a price index which measures the percentage change through time of a constant quantity and quality of goods and services purchased by a representative Canadian urban family in a specified time period. The CPI for each city measures price changes from one time period to another within that specific city. Thus, while city CPI's show the movement of prices in each city, they do not indicate price level differences between cities, or between cities and Canada. The CPI is not a measure of true inflationary-deflationary trends. The inference of using the CPI as a measure of true inflation or deflation is incorrect. The CPI only measures percentage changes of a "basket" of commodities - not all items which contribute to inflation or deflation are included.

### CONVENTIONAL MORTGAGE RATE

The conventional mortgage rate is a simple average of rates as at mid-month charged by a number of large institutional lenders for residential mortgage loans.

### DEPLANED

Traffic (passengers, mail and cargo) which lands and disembarks at an airport.

### DWELLING COMPLETION

Dwelling completion is the stage at which all the proposed construction work on a dwelling unit has been performed.

### DWELLING START

A dwelling start is recorded when the footing has been installed, that is, when the concrete has been poured for the whole of the footing around the structure.

## DWELLING UNITS

Please note, the following definitions are applicable only to data from the Survey of Starts and Completions.

### 1) Single Detached

This is commonly called a "single house". It contains only one dwelling unit which is completely separated on all sides from any other dwelling or structure.

### 2) Semi-Detached

This category includes each one of two dwellings separated by a common wall extending from ground to roof, or by a garage.

### 3) Row

This comprises only single attached houses in a row of three or more dwellings. Row-duplexes are not included in this category.

### 4) Apartment and Other

This category includes dwelling units such as:

- duplexes
- double duplexes
- triplexes
- row-duplexes
- apartments as commonly known
- dwellings over, or at the back of, a store or other non-residential structure.

## EMPLOYED

The employed labour force includes all persons who during the reference week:

1) did any work at all

2) had a job but were not at work due to:

- own illness or disability
- personal or family responsibilities
- bad weather
- labour dispute
- vacation
- other reason not specified above.

## ENPLANED

Traffic (passengers, mail and cargo) which embarks and takes off from an airport.

## FARM CASH RECEIPTS

Farm cash receipts include the cash returns from the sale of all agricultural products except those associated with direct inter-farm intraprovincial transfers. Other components included are Wheat Board payments, cash advances on farm-stored crops, deferred grain receipts in Western Canada, Agriculture Stabilization Act deficiency payments, Western Grain Stabilization Act payments, and provincial income stabilization payments.

## LABOUR FORCE

The labour force is composed of that portion of the civilian non-institutional population fifteen years of age and over who, during the reference week were employed or unemployed.

## LABOUR INCOME

Labour income, comprising wages and salaries and supplementary labour income, is defined as all compensation paid to employees residing in Canada. Supplementary labour income, which is defined as payments made by employers for the future benefit of their employees, comprises employers' contributions to employee welfare and pension funds, workmen's compensation funds and unemployment insurance.

## MIGRATION

Migration is defined as a permanent change of residence from one geographical unit to another.

## NET MIGRATION

Net migration is the difference between in-migration and out-migration for a geographical unit.

## NEW HOUSING PRICE INDEX

The new housing price index measures changes in selling prices of new houses constructed by large and medium volume builders in metropolitan areas. The houses sampled are representative of the total being sold at that time but adjustments are made for changes in physical characteristics to arrive at pure price change. Prices used are the selling prices agreed upon between builder and buyer at the time of signing the contract. Prices relate to mid-month. The composite index includes the house and the serviced lot on which it stands.

#### NEWLY COMPLETED UNOCCUPIED DWELLING

Newly completed unoccupied dwellings are those which are not sold nor rented at the time the dwellings are reported as completed in the Survey of Starts and Completions. The units are surveyed every month until they are sold or rented.

#### NOT IN THE LABOUR FORCE

That portion of the civilian non-institutional population fifteen years of age and over who, during the reference week were neither employed nor unemployed.

#### PARTICIPATION RATE

The participation rate represents the labour force as a percentage of the population fifteen years of age and over. The participation rate for a particular group (age, sex, marital status, etc.) is the employment in that group expressed as a percentage of the population for that group.

#### PRIME RATE

The Chartered Banks' Rate on Prime Business Loans is the rate charged to the most credit-worthy borrowers. The rate shown is of the last Wednesday of the month. When there are differences in the rate charged by individual banks, the most typical rate or rates are taken.

#### RETAIL TRADE

Retail trade is defined as the aggregate sales made through retail locations(outlets). Retail trade estimates do not include any form of direct selling which bypasses the retail store, for example: direct door to door selling; sales made through automatic vending machines; sales of newspapers or magazines sold directly by printers or publishers; and sales made by book and record clubs. Retail trade excludes: retail sales through ancillary units, for example, warehouses, head offices, etc.; sales of contractors whose major activity is not retailing; and retail transactions between individuals.

## SEASONAL ADJUSTMENT

Fluctuations in economic time series are caused by seasonal, cyclical and irregular movements. A seasonally-adjusted series is one from which seasonal movements have been eliminated. Seasonal movements are defined as those which are caused by regular annual events such as climate, crop cycles, holidays and vacation periods, grain receipts in Western Canada, deficiency payments made by provincial governments and the agricultural stabilization board, and provincial income stabilization payments.

## UNEMPLOYED

The unemployed includes those persons who during the reference week:

- 1) were without work, had actively looked for work in the past four weeks (ending with reference week) and were available for work.
- 2) had not actively looked for work in the past four weeks but had been on layoff for twenty-six weeks or less and were available for work.
- 3) had not actively looked for work in the past four weeks but had a new job to start in four weeks or less from reference week, and were available for work.

## UNEMPLOYMENT RATE

The unemployment rate represents the number of unemployed persons as a percent of the labour force. The unemployment rate for a particular group (age, sex, marital status, etc.) is the unemployment in that group expressed as a percent of the labour force for that group.

## VALUE OF MANUFACTURING SHIPMENTS

Value of manufacturing shipments is defined as the gross value of goods produced from its own materials by the reporting establishment, or for its account. Value is net of discounts, returns and allowances, sales tax, excise taxes and duties, returnable containers and common or contract carriers' charges for outward transportation (but not of own carriers' delivery expense). Shipment values in this publication are monthly projections of annual census of manufacturers' values based on returns from a stratified systematic sample of manufacturing establishments.
